

Integration control tower

Concept mockup / synthetic transaction and recovery records

FLOW

Order to ERP

TRACE

Source to target

RECOVERY

Controlled replay

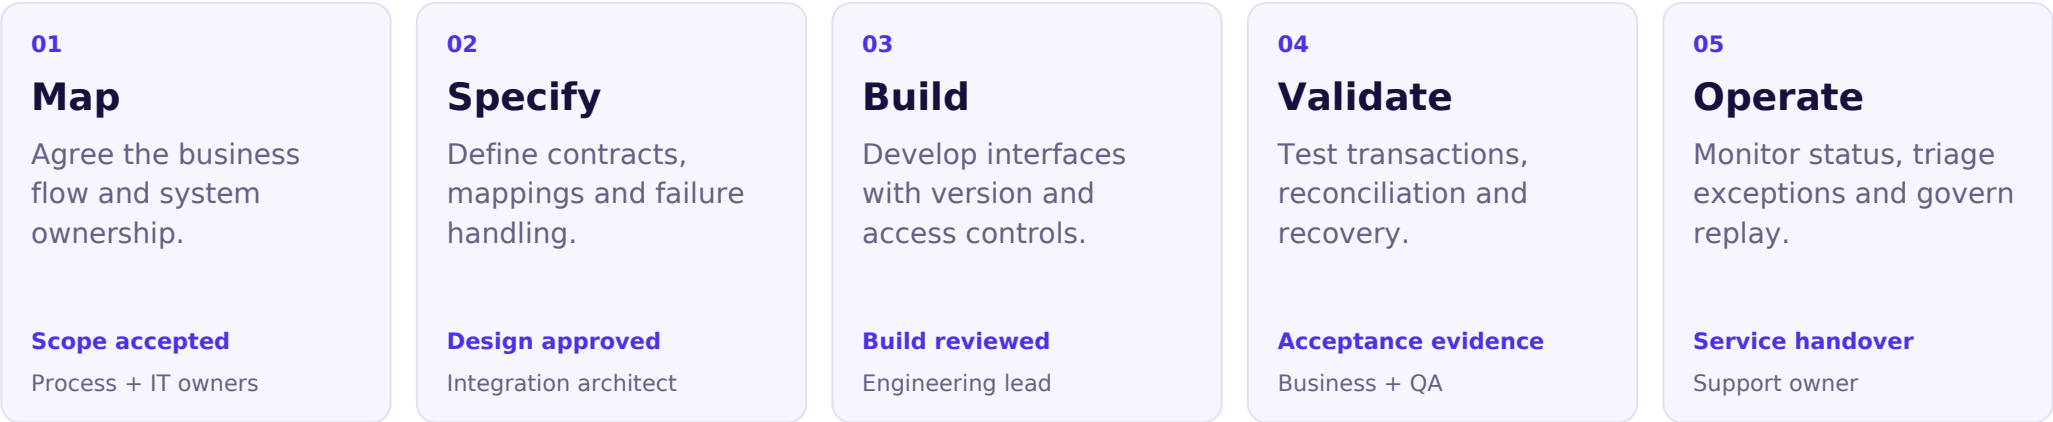

Transaction	Observed state	Next action	Owner
INT-001 / create order	Source accepted / target pending	Check target response	Integration support
INT-002 / stock update	Duplicate request identified	Validate idempotency handling	Interface owner
INT-003 / invoice event	Mapping validation failed	Correct input before replay	Data owner
INT-004 / delivery update	Source-target match confirmed	Retain trace evidence	Process owner

Visibility needs a recovery route and an accountable owner.

A concept monitoring workspace. Monitoring scope, tooling and recovery permissions are agreed for the implementation.

Implementation & governance blueprint

Integration Strategy & Delivery / indicative sequence, gates and accountable roles

GOVERNANCE / DECISIONS, OWNERS AND EVIDENCE

Decision	Accountable role	Evidence
Interface contracts	Source + target owners	Approved mapping and schema version
Release approval	Integration lead	Tests, rollback and release record
Exception recovery	Support + business owner	Triage and approved replay evidence
Reconciliation	Process owner	Source-target match and unresolved differences

Timing and final roles follow the scope, dependencies and readiness. No delivery result is implied.
