

Technology maturity profile

Illustrative baseline / targets set by business need

BASELINE
Evidence-based

TARGET
Business-led

SCALE
Defined per scope

Domain	Sample baseline	Required next capability	Evidence to validate
Architecture	Documented in parts	Owned dependency map	Current diagrams + decisions
Integration	Reactive recovery	Visible exceptions + runbooks	Interface records + incidents
Data	Ownership inconsistent	Named owners + quality controls	Data definitions + checks
Governance	Decisions dispersed	Portfolio gates + risk reporting	Decision log + review cadence

Prioritise the capability gap, not the score.

This profile uses qualitative descriptors. No industry benchmark or client score is implied.

Implementation & governance blueprint

Enterprise Technology Maturity / indicative sequence, gates and accountable roles

GOVERNANCE / DECISIONS, OWNERS AND EVIDENCE

Decision	Accountable role	Evidence
Assessment criteria	CIO + business	Approved model and evidence definitions
Baseline validation	Domain owner	Source evidence and limitations
Investment priorities	Portfolio sponsor	Value, dependency and effort rationale
Reassessment	Governance forum	Updated evidence and decision log

Timing and final roles follow the scope, dependencies and readiness. No delivery result is implied.
